THE CRYOGENICS GROUP SUPPLIER OF CHOICE AT THE 2021 WORLD SCIENCE FESTIVAL BRISBANE

by S. Johnson

The Cryogenics Group were onsite at the 2021 World Science Festival Brisbane to supply much needed liquid nitrogen for a number of exhibitors.

'Big Bang Education' and 'Skunk Control' ran several SOLD OUT shows across the week-end. Young and mature were gasping and cheering as the mind boggling science experiments were carried out live on stage!

Congratulations to all the exhibitors at the 2021 World Science Festival Brisbane!

'Life Sciences Queensland' and 'Logan City Council' met with our Logan Queensland crew to see exactly what it is we get up to.

From critical compressed gas mixtures to routine liquid nitrogen deliveries we discussed our broad range of client and how our customer service means we're leading the specialty gas supply industry.

CRYO HQ! OFFICIAL OPENING!

by A. Joan

The brand new Cryo HQ located in Yatala Queensland will now be the National site for picking, packing and dispatch of cryogenic stock across Australia.

"In recent months we've seen incredible growth in the medical supply sector. Our Australian made products are being shipped across Australia to small medical facilities right up to some of the biggest names in Australian gas." - Marcia Edwards, Director.

Cryo HQ officially opened 20th March 2021.

Stay tuned for some major industry first announcements in the April 2021 'Cryo Chronicals'.

A new mobile cryogenic mini bulk tanker is now on the road thanks to our South East Queensland team.

This new tanker will service a recent influx of medical and industrial clients, inline with our industry leading response times and exceptional customer service.

Preferred Service Provider - Residential waterline maintenance project

by Z. Mia

The Cryogenics Group has been selected to carry out on-going pipe freezing works as part of a substantial residential waterline maintenance project.

Thursday 25th March 2021 saw the very first freeze get underway.

Fantastic to see Government working with local suppliers on local projects.
